White Line Rule

Please note that the white line rule has been extended and won't cease until Sunday 12th March.

The recent wet weather has made the course very damp in places and this is the reason we have extended this.

Thank you for your cooperation!

Verti draining to take place

Weather permitting we will be verti draining as soon as possible.

Why on earth are we verti draining at the start of the competition season?

Verti draining allows the exchange of gases in the soil allowing carbon dioxide out and oxygen in. It will encourage healthier deeper root growth. It aerates the soil and relieves compaction.

It also helps improve the greens surface, improves and promotes good soil structure and creates quicker drying surfaces along with better absorption of water from the surface into the drainage system, helping prevent surface water problems.

Verti draining also alleviates problems that greens face such as compacted surfaces after long periods of continuous use.

Basically verti draining is required to reduce compaction and to allow for good drainage of the green surfaces.

We thank you for your understanding for the requirement of this practice.

Rake & Play

Our Rake & Play initiative will continue up to and including Saturday 11th March.

From Sunday 12th March you will no longer lift clean and place in the bunker but play as it lies.

Thank you for your cooperation with this during the winter months and we ask that continue to adhere to our course rules:

- Rake Bunkers
- Replace Divots
- Repair Pitch marks
